

## Extra Large Lockable Wall Box (IP65-rated)

The 48 fibre IP65-rated extra large lockable wall box is used for the distribution & termination of fibre optic cable devices. The box can be utilised for FTTH applications & other installation requirements to break out and splice input cables into drop cables, pigtails or direct patching. The box may also be used for protective interconnection of a fibre network and is suitable for outdoor, riser and tunnel installations, up to 48 fibre.

### FEATURES:

- The box is made from anti-aging materials, with ultraviolet protective characteristics
- The sealing mechanism is based on pressed rubber/silicon strip and is rated to IP65
- The box is fitted with a lock for additional security and can be installed on walls or mounted on a pole
- Operating Temperature: -20°C ~ +70°C; Storage: -40°C ~ +80°C
- Spare loops of pigtails and drop cables can be stowed in the storage compartment for convenience or for maintenance
- Special locking device for output cables
- Bi-Layer structure for splicing and upper layer for splitting and distribution
- Up to 48 ports (for FC/ST and SC Simplex/LC Duplex)
